

ROAD TO THE TOP

We need your help to pave our road!

THE ASK

The road is about a half mile long and goes up and over the shoulder of a significant hill. Quotes for engineering and construction are \$111,000. We need to raise \$50 a foot to make this happen.

Thanks to those that have already contributed financial donations and a gift of land, we have raised almost half of our total fundraising goal. Help us raise the rest of the goal by the end of 2017!

DONATE TODAY!

THE REASON

We spend a significant amount on maintenance costs each year on our current gravel road. The steep slopes surrounding the road cause erosion that in turn creates potholes that cause significant wear and tear on our vehicles. There have also been accidents on this road causing even more damage to vehicles belonging to Mountain Top and guests.
